Agenda Statement

Item Title: **NAC; Gymnasium HVAC Replacement – Option 1**

Submitted by: Artie Bryson, City Manager

Summary
The existing gymnasium air-handling system at the Neighborhood Activity Center (NAC) has failed. The City reviewed repairing the aging system and replacing it with new equipment. The gym is approximately 8,633 square feet with a 35-foot barrel ceiling. Superior Heating & Cooling proposes four 10-ton Bryant rooftop heating and air-conditioning units (40 tons total) on the adjoining flat roof, with new gym ductwork and associated installation.

FINANCIAL IMPACT AND FUNDING
Option 1 is quoted at $232,600, plus a 10% contingency of $23,260, for a total not to exceed $255,860. The contingency is included in that total—not an additional charge. Funding is proposed from the City's $500,000 Michigan Department of Education (MDE) grant. Given prior NAC expenditures and commitments, this project is expected to nearly deplete the grant balance. Whether MDE would pay for repairs to the existing system has not yet been verified.

RECOMMENDATION
Option 1 provides new heating and operational air conditioning together rather than spending $115,030.78 to repair an aging, heating-only system. Approval is recommended, contingent upon confirmation of Superior's expired October 5 pricing and MDE grant conditions. Any cost above $255,860 would return to Council.

Suggested Action:

MEMORANDUM

TO: Mayor and City Council

FROM: Artie Bryson, City Manager

DATE: November 23, 2026

RE: NAC Gym Heating and Air Conditioning Replacement – MDE Grant

The gymnasium air-handling system at the Neighborhood Activity Center (NAC) has failed. The gym measures 89 by 97 feet (8,633 square feet), with a barrel-shaped ceiling approximately 35 feet high. After reviewing repair and replacement alternatives, I recommend installing four new 10-ton Bryant rooftop heating and air-conditioning units, with new ductwork, on the flat roof adjoining the gym.

1 – Recommended	**Four 10-ton Bryant rooftop units; new heating, air conditioning and gym ductwork. Includes 10% contingency.**	**$255,860 NTE**
2 – Repair	Trane repairs to existing hot-water coils and blower; no air conditioning.	$115,030.78
3 – New AHU	New 60-ton Daikin air handler with hot-water heat; prepared for future air conditioning.	$215,850
4 – Phased AC*	**Option 3 plus preliminary later-cooling allowance ($86,930); not a firm current quote.**	**$302,780 est.**

Superior's $255,860 not-to-exceed proposal consists of a $232,600 base amount plus a $23,260 (10%) contingency; the contingency is included in the quoted total, not added to it. The proposal includes four gas-heat/electric-cooling units, ductwork, gas connections, electrical disconnects, roof curbs and roofing allowance, crane service, thermostats, and permits. The adjacent flat roof above the cafeteria provides a practical installation location, and electrical capacity is not expected to be an issue.

WHY THE FOUR-UNIT REPLACEMENT IS RECOMMENDED

Trane's November 23 repair proposal ($115,030.78) would replace both hot-water coils and most of the blower assembly but would not provide air conditioning or replace the entire aging system. Superior's $215,850 new air-handler option would provide heat and be prepared for future cooling, but would not include working air conditioning. A previously identified $86,930 allowance for adding cooling later would bring that phased approach to an estimated $302,780; this later-cooling figure is preliminary, not a current firm quote. The four-unit option provides heating and air conditioning now for $46,920 less than that phased estimate. The City has been advised to plan for 40 tons of cooling.

MDE GRANT FUNDING AND PROJECT CONTROLS

The proposed replacement will be funded through the City's $500,000 MDE grant. With the NAC improvements already charged or committed to this grant, this project is expected to nearly exhaust the remaining funds. The actual expenditure will depend partly on whether any of the $23,260 contingency is used. I have NOT yet verified whether MDE would reimburse repair of the existing air handler; the $115,030.78 repair alternative should therefore not be assumed grant-funded. Before contract execution, staff will obtain current written pricing (Superior's October 5 proposal has expired) Any cost above the authorized cap will return to Council.

RECOMMENDATION

I recommend that City Council approve Superior Heating & Cooling's proposal for four 10-ton rooftop heating and air-conditioning units at a base price of $232,600, plus a contingency of up to $23,260, for a total not to exceed $255,860, using available eligible MDE grant funds. Authorization should be contingent on written price confirmation and compliance with the grant conditions. This approach replaces the failed equipment, adds air conditioning for year-round NAC programming, and avoids investing substantial grant funds in a heating-only repair of the old system.
